

Social Impact Tracker

At CEIS, we take the view that every social enterprise and voluntary organisation from the smallest to the largest can be measuring their social impact. Long gone are the days when just saying that we were doing 'a good thing' would secure any funding. Today, quite rightly, funders and investors want to know that the investment they make is going to be making a real difference.

Do you have all of your monitoring data all over the place in different files? Is the end of the year task of putting together funders' monitoring reports complete chaos as you try to get all the information together? Wouldn't you like to be able to produce reports at the touch of the button?

Designed by Cunamh ICT, a social enterprise based in Northern Ireland, Social Impact Tracker software is the complete monitoring solution for voluntary organisations and social enterprises alike.

Social Impact Tracker is extremely user-friendly and packed full of useful features including:

- Add your organisation's vision, mission and aims and set your social impact indicators
- Link your social aims to projects, activities and events
- Produce reports on a host of monitoring and evaluation requirements at the touch of a button
- Build a comprehensive customer/client database
- Link individuals to organisations, projects, activities, events, members of staff and more
- Manage staff training records

In addition to attracting more funding and investment, having the power to measure your social impact will assist you in marketing your services and in inspiring your staff and volunteers. Through Social Impact Tracker you can tell the whole story of the impact your organisation is having.

Cunamh ICT are working in partnership with The Tool Factory, a London-based social enterprise, to distribute and promote Social Impact Tracker in the UK. CEIS are now pleased to be acting as their agents in Scotland.

If you would like to learn more about Social Impact Tracker and see how easy it is to get started, contact Emma Stratton on 0141 425 2917 or emma.stratton@ceis.org.uk to book your on-line demonstration.
